EDUCATION AND QUALIFICATIONS

Nnamdi Azikiwe University, BSc. Computer Science

Mar 2023 – present | Anambra, Nigeria

- Expected year of graduation: 2026

TECHNICAL SKILLS

Programming Languages — JavaScript, TypeScript, HTML/CSS, Python, C++, Rust, Go **Web Frameworks** — ReactJS, Bootstrap, Tailwind, SCSS, **State Management** — Redux, Zustand, **Version Control** — GitLab, GitHub, **Tools** — Docker, Kubernetes, Figma, Trello, Slack, Postman, Linux, VS Code, Netlify

PROFESSIONAL EXPERIENCE

Virvent, Software Engineer

Mar 2023 – Nov 2023 | Nigeria

- Designed and implemented a dynamic cart system, reducing cart abandonment rates by **20%**.
- Collaborated with a cross-functional team of **10+** members to deliver features ahead of schedule, achieving adherence.
- Optimized application performance, cutting load times by **30%** through code refactoring and improved **API handling**.

GreenSol, Front-End Engineer

Apr 2025 – Apr 2026 | Nigeria

- Rebuilt core client-facing UI components in **React, TypeScript, and SCSS**, replacing inconsistent legacy markup with a unified, reusable component structure.
- Delivered and maintained new features, functionalities, and products for clients while following **agile methodologies**, leading to optimization of **user experience**.
- Shipped new features and product functionality for multiple clients on a recurring release cycle, working within **agile sprints** alongside **design** and **backend** teams.
- Constructed **scalable architectures** to hasten deployment to the staging and production environments, allowing for swift transition from development to production.
- Introduced **testing practices (unit/integration tests)** for new components, catching regressions before they reached staging.
- Integrated third-party **API** and **SDK** endpoints into the frontend, replacing brittle ad hoc calls with a consistent data-fetching layer.

Intermen B2C Services, Front-End Developer

Mar 2024 – Sep 2024 | Nigeria

- Spearheaded the **creation** of a new UI style guide, incorporating intuitive design patterns that **reduced user errors** by **40%** and enhanced the overall user experience.
- Led the **development** and **maintenance** of **50%** of the QuickQuotes B2C service platform's user interface, leveraging technologies such as **React** and **TypeScript**, resulting in a **25%** increase in user engagement.
- Collaborated closely with the design team, back-end developers, and stakeholders to seamlessly integrate front-end components into **system architecture**; achieved a **30%** increase in website performance and reduced load time by **2 seconds**.
- Played a crucial role in identifying and resolving **performance** and **security** issues on the platform, which increased uptime by **10%**.

CERTIFICATIONS

FCC JavaScript Algorithms and Data Structures (Beta) - November 2024 [🔗](#)

- Built a project applying core data structures and algorithms concepts as part of the certification curriculum.
- Completed coursework covering algorithms and data structures, including problem-solving exercises in sorting, searching, and complexity analysis.

PERSONAL PROJECTS

SoundVibe, Technologies Used: ReactJS, CSS [🔗](#)

Sep 2022 – Oct 2022

- Designed to sync with users' actual Spotify data in **real-time**, providing personalized suggestions based on their preferences.
- Integrated Spotify API endpoints to develop a music recommendation engine.

TrackMe, Technologies Used: NextJs, Tailwind CSS [🔗](#)

Sep 2022 – Oct 2022

- Developed a modern web app for **streamlined** project management and issue-tracking tool that helps teams plan, assign, and monitor the progress of their work in one central place.
